CAREER OBJECTIVE

Motivated Computer Science student pursuing a Bachelor of Engineering, equipped with skills in C, Python, Java, JavaScript, React.js, HTML, CSS, and Tailwind CSS. Experienced in building front-end projects and collaborating in team environments to solve problems effectively. Eager to contribute technical expertise to innovative projects, learn from industry professionals, and thrive in a dynamic work setting.

PROJECTS

Portfolio

- A personal portfolio website was developed using React, Tailwind CSS, and AOS animation to showcase skills, experience, and projects. This project applied front-end development expertise by creating a responsive and visually appealing design while demonstrating proficiency in building dynamic and interactive user interfaces with smooth animations for an enhanced user experience.

Todo List

- A To-Do List application was developed using React, Tailwind CSS, and MongoDB for efficient task management. It features a responsive UI with MongoDB for data storage, demonstrating expertise in state management and backend integration for seamless data persistence. The project ensures a smooth user experience with a clean and modern design.

Calculator

- I built a calculator using React.js as my first project, where I learned the fundamentals of component structure, state management, and event handling. This experience deepened my understanding of creating dynamic user interfaces, and I'm eager to explore more advanced features and challenges with React.

Certifications

- Completed an online certification in [Introduction to IoT](#), [Introduction to Industry 4.0](#) and [Industrial Internet of Things and Cloud Computing](#), awarded by the Indian Institute of Technology Kharagpur.
- Holding an [online certification](#) in AI-powered ML & DL Techniques from United IT and CAD Division, completed during a 15-day internship.
- Holding an online [certification](#) in Blockchain, earned through a workshop at Kumaraguru College of Technology.
